It's one of the best games I've ever played 4X. Pulls for hours, but please remember that how we perceive the game depends on our tastes.

I offer compliments to the creators of the game.

English is not my mother tongue, so excuse the mistakes.. I really enjoyed the visuals of the game, HOWEVER. I have had countless games where left clicking or right clicking will move your peice and 99% of the time is accidental. There is no option to change this feature and has really damaged the outcomes of some great games. I am going to ask for a refund. This has really infuriated me becuase some of the games have been really engaging and thrown away simply by just trying to move the camera and the game registers it as a move to a certain spot.. Poland can into Steam! Poland can into my favorite games library!

Psst.. Prussia will rise again.. I had a problem and the developers fixed it. Great fun casual game.. Reminds me of an old program I loved waaaay back when called VistaPro...which allowed you to create terrain and foliage using a very basic computer system...at the time a 486? Love the ease of which you can create your scenery or control to a degree of what is generated. Powerful tool, but unsure how to integrate what is created here to be used in Unity or AGFPro.. Menu has a turkish option but the flag is incorrect. It should not be difficult to fix.

This game seems silly at first ... a goat + mouse physics puzzle platformer, but that's a pretty good description. The elements are pretty balanced as well. You will be solving puzzles, experimenting with (and sometimes naturally discovering) new mechanics pretty regularly, and all the while trying to use your little mouse helper along the way. Heck (no spoilers) but even the "final boss" helps you (that's all I'll say). There were a ton of neat mechanics, and I only had to look up stuff about 2-3 times in the 107 levels I did, so not bad for making mechanics naturally discoverable! Also the game looks great, it's 2D but has great animations, shadows, etc.

Even after I thought I beat it, I kept coming back for all the other levels (didn't do any of the super, psycho challenge levels because the platforming was a bit too brutal for my mood at the time) and found myself playing it twice as long as I thought I would. Kudos to the devs, and if there's ever an Escape Goat 3 (hopefully), it's an easy buy from me!. Great story. Very beautiful graphics. Your choices are important.. You know drugs? This **** is worse. Worth the \$8 For a amazing game with a great story!. Great game , absolute fun !. i cant ♥♥♥♥ing play online because ♥♥♥♥ing steam didnt give me the ♥♥♥♥ing key code♥♥♥♥♥♥♥♥♥♥off ♥♥♥♥♥ you.. GachiPls OMEGALUL. This is an old school dungeon crawler and is somewhat reminiscent of the old "Temple of Apshai".

There is no WASD movement. Click where you want to go and your man will walk there.

Battles auto engage when your character and the MOB meet.

Thile this game is somewhat limited as to what you can actually do, it does scratch that nostalgic itch.

Graphics are 16 bit-ish soundtrack is MIDI-ish. The in game music tends to get on ones nerves after a while (I turned it off)I didn't find any bugs and the game works smooth. If you're looking for a simple time killer that reminds you of the good old days, this isn't bad. If you're looking for more... Not going to find it here.

Overall rating 5/10 based on repetitive simplicity but I would recommend to that that want to re-live their childhood.. 8/10 - Great arcade-style wave shooter with a novel method of killing the enemies. Excellent graphics, very smooth performance and an absolute steal at \$5.00! Can't wait for the next chapter.. i got this game during the early release. it is a good VN the art is okay buy you should buy it for the laughs cause every route i played was comdey gold so you want a VN that is going to give you a laugh this is one to get. but their new game maxs big bust art puts this game which was their first to shame. but i understand the art due to it being their first game but that aside you should buy
